

Math 5099 Graduate Seminar– Fall 2024  
w/Professor Berchenko-Kogan

Paul Carmody  
Reflection #3 – September 25, 2024

Value Modeling in Systems Engineering.  
Speaker: Dr. Karen Holness

This was a very interesting talk on overall systems operations and analysis. I have seen this sort of thinking many times in my previous career. What was most interesting was the system life cycles, from inspiration and implementation to maintenance and final dismantling. These are certainly all necessary steps in any complicated subject.
